Declaration regarding the funding status and funding sources of a project proposed in the context of the special call "Digital Health in Developing Countries" by Else Kröner-Fresenius Foundation

Project title:	Telehealth Services for Myanmar (Telekyanmar Project)
Project goal:	To improve health care access and quality in conflict-affected areas of Myanmar through telemedicine and capacity-building initiatives
Applicant organization in Germany:	Goethe University Frankfurt
Applicant organizations in Myanmar:	Karen Department of Health and Welfare Health Department, Kachin Political Interim Coordination Team Health Department, Karenni State Interim Executive Council Telekyanmar Telemedicine Team, Ministry of Health, National Unity Government of Myanmar

Dear Madam/Sir,

We hereby declare that this project proposal presented to Else Kröner-Fresenius Foundation has not been submitted to any other funding institution. This declaration confirms that our application for this project is new and exclusive and has not been duplicated or submitted elsewhere for consideration.

As a program, Telekyanmar has previously received financial support from the following sources: Cambridge Global Health Partnership Myanmar Emergency Fund (CGHP_MEF) from August 2021 to February 2022, from June 2022 to October 2023, and from March 2024 to May 2026; Health Equity Initiative (HEI) from May 2023 to December 2023, and from January 2024 to December 2024. In the year 2024, 40% of the overall Telekyanmar budget was funded by HEI, 40% by CGHP_MEF and the remainder by individual donors.

As the new tele-touring project proposed here is an exclusive expansion of the main telemedicine program and will involve close collaboration with three different ethic health organizations (EHO), the proposed project budget, if funded, will be supported solely by Else Kröner-Fresenius Foundation.

Financial support by Else Kröner-Fresenius Foundation over a three-year period for the collaborative project proposed here would make a substantial contribution towards stabilizing Telekyanmar's and EHO operations, providing more reliable funding compared to other sources that typically offer only short-term commitments.

Sincerely yours,

Dr. Ulrich Kuch
